

## LIFETIME WARANTEE / RETURN INSTRUCTIONS

You need not contact our facility for a free replacement part. Simply follow the instructions provided below to ensure prompt replacement of your returned item with a new one.

This form can be printed out, completed, and returned with the item to ensure the correct replacement part, shipping information, and allow us to evaluate the unit for quality control purposes. Regardless of the reason, we will immediately ship the replacement upon receipt of the return product.

**A SIMPLE TEST BEFORE RETURN** saves you time & helps you source the problem. If possible, we recommend prior to return, replacing the breaker with the same automotive type fuse and same amp rating. Other matters may create a false indication the breaker is defective. If the fuse blows, it is probable the breaker is not defective but other matters such as shorted wiring or mechanical issues are causing excessive current draw.

*SEND TO:*

*SNAP ACTION, INC. 1260 US Highway 22, Mountainside, N.J. 07092*

Your name \_\_\_\_\_
